GD-P-1 apparatus is using the modern laser treatment principle combined with Chinese traditional medicine theory of acupuncture, the original "light acupuncture" and "light cycle" therapy.

It adopts low-level laser with the wavelength of 810nm to noninvasive irradiate our pain point. After low-intensity laser applied to biology, there is no irreversible damage to the biological organization, just cause a series of physiological and biochemical changes, such as anti-inflammatory and analgesic, convergence wound, desensitization, adjust the body function. It also adopts blue and yellow light, which light intensity is over 2000mcd. It can anti-inflammatory, wound healing and sterilization, promotes serotonin and vitamin D metabolism. It can directly penetrate the meridian, producing more biological enzyme. Caused a series of physiological and biochemical changes to cure kinds of disease. Such as the cervical spondylosis, lumbar disc of herniation, frozen shoulder, arthritis, prostatitis.

It can rapidly absorb the prostatitis (hyperplasia) caused tissue inflammation, Shrink Gland, Eliminate the oppression tissue around the urethra.

In hospital clinical test for 30 patient, 15 patient is Significant effect, 15 patient have effect. only 2 patient is no effect. total effective rate 93.33%.

TREATMENT PRINCIPLE

GD-P-1 apparatus is using the modern laser treatment principle combined with Chinese traditional medicine theory of acupuncture, the original "light acupuncture" and "light cycle" therapy.

It adopts low-level laser with the wavelength of 810nm to noninvasive irradiate our pain point. After low-intensity laser applied to biology, there is no irreversible damage to the biological organization, just cause a series of physiological and biochemical changes, such as anti-inflammatory and analgesic, convergence wound, desensitization, adjust the body function. It also adopts blue and yellow light, which light intensity is over 2000mcd. It can anti-inflammatory, wound healing and sterilization, promotes serotonin and vitamin D metabolism. It can directly penetrate the meridian, producing more biological enzyme. Caused a series of physiological and biochemical changes to cure kinds of disease. Such as the cervical spondylosis, lumbar disc of herniation, frozen shoulder, arthritis, prostatitis.

LASER ACUPUNCTURE V.S. NEEDLE ACUPUNCTURE

1. No Pain
2. Sterile
3. Non Invasion
4. Safe And Easy To Operate
5. Use Widely

LASER ACUPUNCTURE

1. Neck/Back/Shoulder pain
2. Rheumatism
3. Arthritis, Prostatitis
4. anti-inflammatory
5. wound healing and sterilization
6. Asthma, chronic bronchitis
7. Chronic pelvic inflammatory disease
8. Mammary gland hyperplasia
9. promotes serotonin and vitamin D metabolism

Why 810nm and 650nm:
650nm can only penetrate shallow skin (2-3 cm) like vessel wall, to relief the shallow pain and wound healing.
810nm can penetrate deep to the pain area, about 5-7 cm, so to treat arthritis, knee, shoulder pain, etc.

INTENDED APPLICATION

PAIN RELIEVER

LASER ACUPUNCTURE

1. Neck/Back/Shoulder pain
2. Rheumatism
3. Arthritis, Prostatitis
4. anti-inflammatory
5. wound healing and sterilization
6. Asthma, chronic bronchitis
7. Chronic pelvic inflammatory disease
8. Mammary gland hyperplasia
9. promotes serotonin and vitamin D metabolism

BODY PAIN RELIEVE CORRESPOND ACUPOINT

Tips:
Choice Three of the correspond acupoint:
Using the Laser beam stick on those three acupoint to irradiate. 15 min per time. Twice per day;

1. Prostatitis
2. Cervical spondylosis
3. Lumbar disc of herniation
4: Arthritis
5: Frozen shoulder

INSTRUCTION TO USE

1. Turn on the device
Press the "on/off" button for two seconds, you will see led screen is on.

2. Set the time
Default time is 10 mins, press the time button to adjust time. 10/15/20/25/30 mins.

3. Set the power
Press the power button to adjust the power level. Level 1 for pulse work mode. Level 2/3/4 for continuous work mode

4. Start the treatment
Press the "on/off" button again to start the treatment, you will see the laser probes are emitting the laser light.Put the device to the pain area, let the laser irradiate that pain area.
Notice: * clear the skin before the treatment, * avoid the sweat, anything in black color like hairs and mole.
If you feel any uncomfortable, please just remove the device to stop the treatment.

5. Turn off the device
Long press the "on/off" button to turn off the device.

FAQs

Q: Is cold laser therapy safe?
A: Cold laser therapy is internationally recognized the pure green phototherapy, no trauma, no side effect and non invasive, avoid the unkind effect of infection and bleeding, even the side effect and durable dependency from taking drugs.

Q: Can the Semiconductor laser therapeutic instrument replace drug treatment?
A: Semiconductor laser therapeutic instrument is to assist the treatment apparatus, reduce the medication gradually according to the treat situation, but need to consult the doctor. But there are also some cases indicated that the practical use of Semiconductor laser therapeutic instrument can be discontinued medication after used the instrument, but to be under the doctor's guidance.

Q: How do I choose the power and treatment time?
A: For the power, there are four levels. Level 1 is pulse mode, level 2/3/4 are continuous work mode.
For the time, there are 10/15/20/25/30 mins to adjust.
For the general patient, we suggested for 10 mins with level 1 power. It's suggested twice or three times per day, 30 mins per time. The time and power can be gradually added according to your own fitness scale or adaptability.

Q: What others should I pay attention to during the treatment period?
A: You do not need to change your normal living habits, while you should develop a certain diet or do certain exercise. It is suggested to clean with 0.9% normal saline (sold in drugstores) or gently wipe with a wet paper towel.

Q: Will I feel anything during the treatment?
A: You will hardly feel any pain, harshness or other discomfort, however, since light luminance coming out of the therapy head is fairly high, please do not bring out the phototherapy head and directly observe the light. * avoid the sweat, anything in black color like hairs and mole. * wipe with a wet paper towel.

Q: How to charge it?
A: A lithium-ion battery is installed in this host, you will need to charge it when the host gives out continuous warning tone "beep, beep, beep", then please connect the USB line to a computer USB port for charging. 5-6 hours for each charge.

PRODUCT STRUCTURE

INFORMATION TO USE

SPECIFICATION

PRECAUTION

ITEM | DESCRIPTION
--- | ---
Laser medium | GaAlAs Semiconductor
Laser wavelength | 810nm x 1pc+650nm x 6pcs
Laser output power | 60~150mW for 810nm, 5mW for 650nm
Laser operating voltage | 3.6V
Input voltage of power | 100~240 V
Timing range | 15mins for auto setting
Environment temperature | -20~+40℃
Relative humidity | ≤95%
Atmospheric pressure | 68kPa ~ 106kPa
Power source use | Rechargeable Lithium-ion battery
Size | 25.8 x 11.1 x 7.0 (CM)

1. Avoid any black, such as black skin, hair, mole etc.
2. Age under 18 years old
3. Pregnancy period
4. Carcinoma and malignant tumours
5. Patient with cancer
